 Available Worldwide (Remote)

PROFESSIONAL SUMMARY

Results-driven Full-Stack & Android Developer with practical experience in building responsive web applications, secure backend services, and native Android applications. Proven ability to architect production-ready backends using Node.js, Express, PostgreSQL, and Supabase, complemented by clean frontend engineering and modern UI design.

TECHNICAL EXPERTISE

Languages

Java JavaScript (ES6+) Python HTML5
CSS3

Backend & Databases

Node.js Express.js PostgreSQL Supabase
SQLite Firebase Firestore

Tools & Workflow

Git & GitHub REST APIs Helmet Security
Resend Email API Vercel

Creative & Media

Video Editing UI Layout Design
Figma Fundamentals

FEATURED PROJECTS

Calorimeter — Android Application

Mobile Development (Android / Java)

A modern Android nutrition tracking app featuring precise calorie and macro logging, intuitive visual progress indicators, custom meal creation, and local data persistence.

Production Portfolio & Contact Backend

Full-Stack Web (Node.js, Supabase, Express)

Secure serverless API backend featuring rate-limiting, XSS sanitization, parameterized PostgreSQL queries via Supabase, and automated instant email notifications via Resend.

FREELANCE SERVICES

Full-Stack Web Development
Custom responsive websites, RESTful APIs, database integration, and secure form backends.

Android App Development
Native Android application development with intuitive UI and clean architecture.

EDUCATION

Bachelor of Science in Computer Science

Undergraduate
